Hello and welcome to the University of the People. In this tutorial, we're going to learn about Moodle. Moodle is a learning platform that we use at your people. Here we're looking at the main page of one of the courses. At the top of this page you will find different links organized by different topics, such as the syllabus, the textbook, and announcements by of course instructor. For each week during the course, there will be a new unit. Here in this tutorial, we can see the first week's unit, as well as next week switches for unit to the following week a week number three will contain the third event and so on as the term continuous. Now the fifth unit is the last unit we see, as we are currently on week number five. Only next week when we see in the next unit which will here, which is unit six, young people's learning model set up to be a very flexible learning experience for students. Students are not required to be online at a specific time during the day, as long as their assignments are submitted by the Debye. And at the end of each week, students are given the opportunity to complete their work at their own pace. This is called asynchronous learning environment. At the beginning of each week, students are expected to read the learning guide, which has a similar structure to an e-book. It is designed to make it easy for students to go to the pages, read, introduction and introductory post. Here's where we see the reading assignments. In this case, the assignments to read chapter two of the textbook, which can also be downloaded. In some cases, there may be recommended videos to watch. However, videos I never mandatory parts of the assignment that your people, your people as part of the open educational resources movement, meaning that all reading materials are free of charge for our students. Afterwards, breeding the weekly assignments, students are required to participate in the discussion forum. In the discussion on, students are asked to review three of their peers, width, which will reflect the grade your peers are given, and repairs will grade your own work after you've submitted your assignment. In addition, Retina finance are also graded by your peers. With a learning journal is graded by your instructor. On some weeks, you will have a review and in others, a quiz. At the end of each course in the undergraduate program, students will be required to take a final exam, which will be part of their final grade in case they've encountered any difficulties. E-mail or message the instructor through the messaging system in Moodle. If you have technical issues or other questions, you should contact your program advisor. You can also ask your peers and our social networks such as Yammer. Keep in mind that Moodle allows access only while you are enrolled in a course. So if you want to see if the materials, it is best to download them to your computer for future use. And the following term, access to the course you've registered for it will appear and Moodle. And the students portals, students are able to see all the courses they've registered for it, as well as her past courses which each of the grades they have received. We hope this tutorial has been helpful to learn about Moodle.
